All additions, remodels, fences, sheds, new roofs, etc., must go through the Villages of Wilson Green Architectural Control Committee (ACC). We will need the ACC application explaining what your plans are and what type of materials you will use, etc. We will also need a copy of the site plan/survey of the house/property that shows the setbacks; this should be in your closing documents.

All documents given to the ACC committee are placed in your file and are not returned to you, so only give us copies of the documents.

Please email, fax or mail all requested information to my office.

After the ACC meeting, you will be called and made aware of the decision of the ACC followed by a formal letter that will be mailed to you for your records.

If you have any further questions, please feel free to contact me:
